

DCM COW MANURE

Technical description

Organic soil improver based on dried cow manure with 50% organic matter, in pellet- or crumble-form.

Characteristics

- dried cow manure
- high content of dry and organic matter due to the drying process, which ensures a light and crumbly soil structure
- increased capacity to retain water and nutrients
- dried and heat-treated in accordance with the hygiene requirements of Council Regulation EC1774/2002 and because of this free from weeds and pathogens
- safe for both plants and soils
- can be used until just before sowing or planting, without risk of burning
- authorised for use in organic agriculture (only contains raw materials authorised in Annex II of the Council Regulation EC2092/91 on the biological production method and Amendments).
- pellet- or crumble-form, easily applicable, also on rough terrain (spreadable like a pelletized fertiliser)

Packaging
