

DCM ECO-TERREAU®

Characteristics

- Excellent potting soil, suitable for the cultivation of all kinds of vegetables & herbs
- quality raw materials, including high-quality peat litter enriched with seaweedlime, for a light and airy substrate that even after repeated watering and dehydration rapidly takes up water again
- specially adapted organic basic fertiliser that releases during 100 days the necessary nutrients for a steady and balanced growth.
- Suitable for use in organic agriculture – only contains raw materials in Annexe I of the E.U. Regulation (EC) 889/2008 on the biological production method and Amendments

Technical description

Growing media – Potting soil with a base of peat litter, dark peat, clay, meal of oil press-cakes derived from grape stones, seaweedlime and 3 kg/m³ compound organic fertiliser NPK 7-7-10, 1 kg/m³ compound organic fertiliser NPK 9-3-3 with

- ✓ 55 % organic matter
- ✓ 35 % dried matter
- ✓ pH= 6
- ✓ conductivity: 45 mS/m
- ✓ waterretaining capacity: 670 ml/l

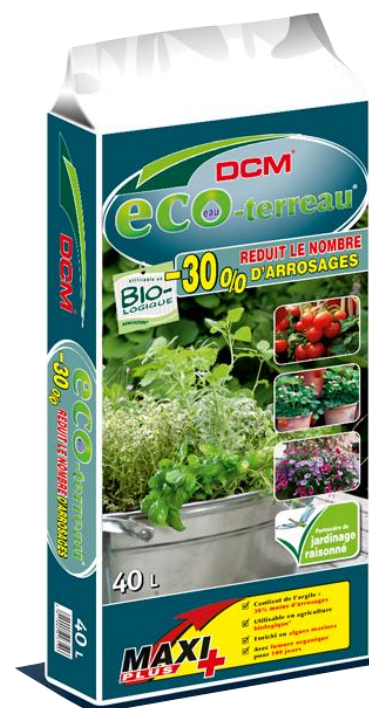

Packing

bags of 40 L – 54 bags/euro-pallet (= 2610 L)

Instructions for use

In Pot

1. Use a pot with drainage holes in the bottom so that excess water can run out easily.
2. Loosen up well the DCM Eco-Terreau[®] and use it to partially fill up the pot. Leave enough space for the root ball.
3. Take the plant, carefully loosen up the roots and remove as much as possible the old potting soil. Make sure that, before repotting, the root ball is sufficiently moist.
4. Put the plant at the desired height in the pot and fill it up with DCM Eco-Terreau[®] about 2 cm below the rim of the pot.
5. Press the potting soil and water abundantly in order to obtain a good connection between root ball and potting soil.

In open field

Sowing: Cover the sowing seed with a layer of DCM Eco-Terreau[®]

Planting: Mix DCM Eco-Terreau[®] in the soil for a better structure, then start planting

In greenhouses

After sowing recover with a layer of DCM Eco-Terreau[®]

Cuttings: Put the cutting in the DCM Eco-Terreau[®].

Ask for our specific advice.

Extra tips

- This potting soil contains organic nutrients for a balanced growth and abundant flowering during 3 months. Afterwards one must apply a top-dressing in order to maintain growth and flowering. For that purpose apply DCM Organic Liquid Fertiliser for Vegetables and Herbs.
